WHO ARE WE?

Alvern cables is a privately owned business that manufactures a variety of low to medium voltage electrical cables for domestic and industrial use. The company was established in 1967 essentially to manufacture and supply cables to its then parent company S.A Signals. The three individuals mentioned at the outset, A.E Hendey, V. Higham and P.G Wiggin were all contracted to the railways as electricians in the signaling division.

Difficult supply and poor quality of cables led them to manufacture their own range which grew rapidly until the inevitable happened and the signaling side was taken over by the cable section. Today, Alvern Cables is one of the leading cable manufacturers in South Africa and the largest privately owned operation in the industry.

Alvern Cables has found its niche in the automotive, domestic, flexible, equipment, power, and control sectors of the industry. Even within the limited sectors specified one cannot manufacture the complete range required, however, we believe our range is comprehensive and tailor made to suit the harsh African environment. Alvern Cables consistently produces high quality and innovative products all subject to stringent tests and specifications.

We have a fully equipped SANS accredited laboratory with the latest equipment to ensure all requirements are met and exceeded. Products are tested at each phase of production, recorded and labelled for complete traceability in accord with ISO 9001 requirements. The Alvern Cables manufacturing plant is situated in Germiston.

Alvern Cables has established a distribution division tasked with outsourcing high-quality products such as specialised cables, cable accessories and a range of renewable products that include lithium battery technology options, quality inverter ranges and high-quality solar panels. With the renewable energy market sector rapidly growing,

Alvern Cables want to be a part of a greener South Africa.

We distribute from Germiston, Durban, Cape Town, Gqeberha and Polokwane. Our distribution network covers South Africa extensively as well as Sub-Saharan and East Africa. As a result, all products can be made available from one location.

OUR PARTNERS

Our partnerships include Hensel; a leading company specializing in the manufacture of innovative electrical enclosures, and power distribution systems. TKD Kabel GmbH; providing a wide range of products for various applications across almost all industries, offering comprehensive cable solutions.
